further n cycles, wherein the distances between adjacent
switching edges [can be derived] <u>are derivable</u> from the inverted
random numbers instead of from the random numbers.

<center>R E M A R K S</center>

This amendment is being made simultaneously with filing this
application. The specification and claims have been amended in
accordance with USA practice under 35 USC 112 and to eliminate
multiple-dependent form claims. No multiple-dependent claims
exist as of the filing date.

No multiple-dependent form claims exist in this application.

Please enter this Preliminary Amendment prior to calculating the
claim filing fee and prior to an action on the merits, which is
respectfully requested.

Respectfully submitted,

Dr. Frank Sattler, et al
